

TRINITY

IT WILL BLOW YOU AWAY

Trinity **TURBOSOP**

Order Entry is the most important customer-facing aspect of your distribution system. It tells your customers how well you understand their needs and buying patterns and it should demonstrate to them just how efficiently you can handle their requests. At the same time it is a vital tool that should enable you to upsell, cross-sell and grow your business. It needs to be fast and it needs to be smart. That's why you should look at TurboSOP from Trinity.

WHAT TURBOSOP GIVES YOU:

- **SPEED** – No more navigating to other screens to do your look-ups. Do all your searches direct from the item number entry field.
- **ACCURACY** – The system knows the pack size your customer likes, which products they regularly buy or are on their specific contract.
- **INFORMATION** – Availability, price, sales history, on order and plenty more – all there on screen.
- **SALES** – Taking your order so quickly gives you more time to sell. Promotions are highlighted as well as target sales lists and linked upsell items.
- **FLEXIBILITY** – Not everyone in your team wants or needs the same information. Your supervisor can control who can see margins, prices...etc.
- **SIMPLICITY** – No outside training needed. You'll have it installed and set up in minutes and your sales team can use it immediately.

Item Number	D	Description
PIZ+M		

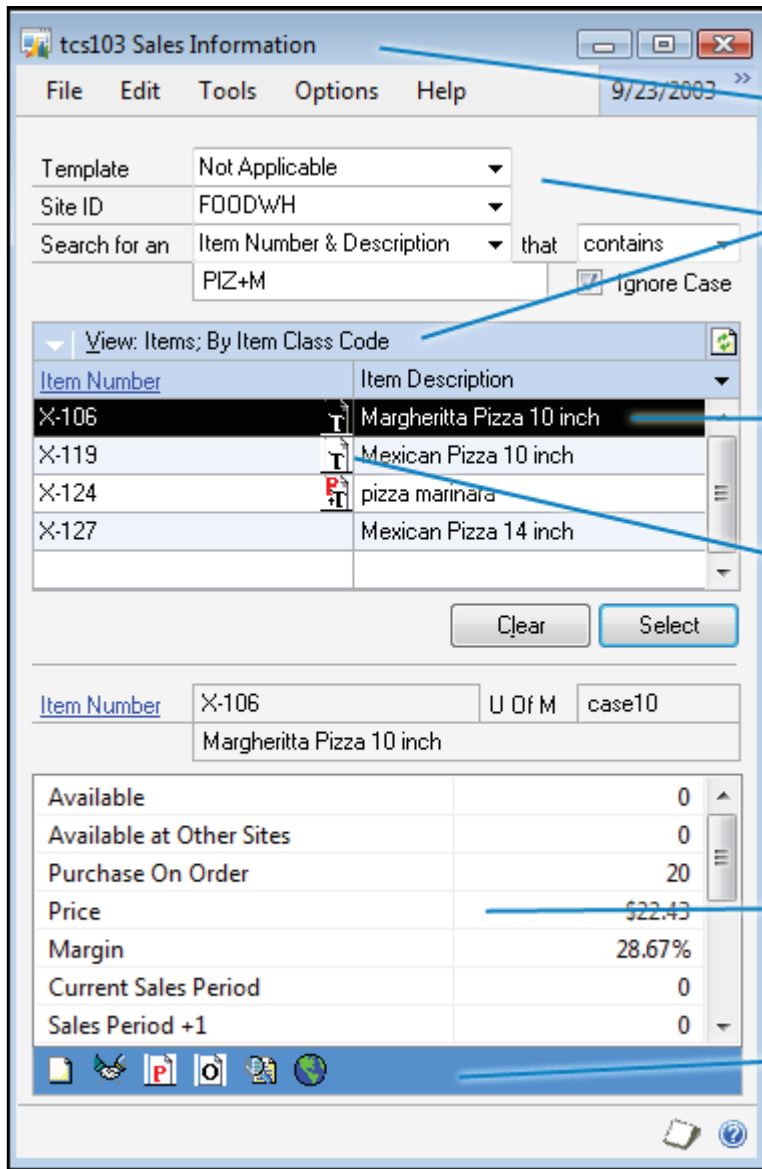

New unstructured search in item entry field of Sales Transaction Entry means you can enter as much or as little as you know of item number, description, class, etc. Using + sign you can even enter multiple strings. Calls great item look-up and info screen (see over).

HOW DO I FIND OUT MORE?

Visit www.turbosop.com where you can:

- See an online presentation
- Download a free evaluation copy
- Request a one to one demonstration
- Learn about our great pricing deal

Remember if you already own Customer Templates we are offering you TurboSOP absolutely free to thank you for supporting our products.

New look-up sits next to order entry screen so you can always see the order.

Multiple search filters and sequences e.g. buying history, sequenced by class.

Just hit "Enter" to drop this item into the order with option to return to lookup.

Icon indicates "previously purchased" and whether the item is on promotion.

Simple mouse-free navigation tools to accelerate the order entry process.

Supervisor can configure individual user screens in seconds. Up to fifteen fields.

Great drill downs, item notes, stock by site, buying history, promotions and more.

ABOUT TRINITY

Trinity are a leading UK based reseller of Dynamics GP who have also been providing add-on solutions to the GP market since 2000. We are dedicated to the distribution market and have over thirty solutions that touch every aspect of the business- sales, pricing, inventory, logistics and purchasing.

We have many hundreds of companies using our products in over twenty countries and are represented in North America by Azox Inc. We love to talk to partners and users to learn about their needs and are happy to offer free consultation on any aspect of your distribution business.
